REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The polynucleotides of the Instant Application encode a novel and nonobvious aminergic receptor of the *TAR* subfamily that is similar to rat and Zebrafish *TAR* receptors (Borowsky, et al, 2001, Proc. Natl. Acad. Sci., 98(16): 8966-8971) and identical to the recently-disclosed human *TAR* receptor (Bunzow, et al, 2001, Mol. Pharmacol., 60(6): 1181-1188). The claims of the instant application are directed to polynucleotides encoding the receptor as well as vectors comprising the DNA and recombinant methods of producing the protein. The claims are free of the prior art as the polynucleotide has not been disclosed or studied in the prior art. The specification provides evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
